

LISTING OF THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Claim 1 (currently amended) A speaker damper, comprising a damper casing and a metallic whisker, wherein the damper casing is a woven pad formed as a circular wafer with corrugated sections which are corrugated so as to have peak segments and valley segments; and the metallic whisker is intermittently ~~buried in~~ penetrates through the damper casing between a first surface and a second surface of said damper casing, and is held by a fastening string at every juncture either intermittently along the direction of a plurality of peak segments or consecutively along the direction of a plurality of valley segments of the damper casing. at least one of said peak and valley segments.

Claim 2 (currently amended) The speaker damper according to claim 1, wherein a fixing binder is applied to secure said fastening string to said at least one of said peak and valley segments. ~~every juncture of the damper casing and the metallic whisker tied with the fastening string.~~

Claim 3 (new) The speaker damper according to claim 2, wherein said fixing binder is also applied to secure said fastening string to said metallic whisker.

Claim 4 (new) The speaker damper according to claim 1, wherein said metallic whisker is held by respective said fastening strings to a plurality of said peak segments.

Claim 5 (new) The speaker damper according to claim 4, wherein a fixing binder is applied to secure each of said fastening strings to the corresponding said peak segment and to said metallic whisker.

Claim 6 (new) The speaker damper according to claim 1, wherein said metallic whisker is held by respective said fastening strings to a plurality of said valley segments.

Claim 7 (new) The speaker damper according to claim 6, wherein a fixing binder is applied to
secure each of said fastening strings to the corresponding said valley segment and to said metallic
whisker.
